

## C8-Pro

The **C8-Pro** is the ultimate C-Series Reformer, featuring an oversize aluminium profile and Footbar and an 8 PU wheel carriage system for the quietest and lowest maintenance ride available.

Like all Align-Pilates commercial Reformers, the C8-Pro features our patent pending Rapid Change (RC) spring bar for the easiest and quickest adjustment on the market.

Many Pilates professionals choose their Reformer based on the ride characteristics and the biggest determinant of that is the number and type of wheels. The number and material of the wheels determine the resistance of the carriage, the sound the machine makes, the handling of cross loading and the amount of maintenance required. The C8-Pro uses 8 'roller blade style' wheels which are designed to give a quieter and softer ride with greater rolling resistance.

Among other premium Reformers, the C8-Pro has the advantage of versatility: It's size provides a comfortable range of motion to suit a variety of clients but is also easy to move, stack, or stand — and is our only Reformer which can accept both a Full and Half Cadillac. This makes it perfect for a multifunctional studio which needs to offer a variety of classes within a single space.

The C8-Pro's Rapid Change spring bar radically alters the ease and speed of adjusting your Reformer, which is particularly beneficial for those running group classes (where the C8-Pro really excels). The spring bar can simply be adjusted with the springs attached, with one hand, and in a single action, which saves up to 12 additional actions when compared with most standard spring bars.

## C8-Pro Noir

The **C8-Pro Noir** is a new take on the C8-Pro with a sleek, black finish designed purposefully for boutique Studios, clubs, and fitness facilities that want to combine style and functionality.
