CLP

Compact Leg Press

3-in-1 Machine Design

Leg press, hack squat, and calf raise all in one unit. Fits athletes from 4'11" to 7' tall.

Hack Squat

Independent horizontal and vertical pad adjustment for a precise setup at any height. Guided sled path loads the quads with precision, built for progressive overload without joint strain

Leg Press

Smooth, linear pressing paths targets quads, hamstrings, and glutes without spinal load. No tools needed to switch from leg press to hack squat.

Footplate

Adjustable positioning shifts emphasis from glutes to quads to full leg. Non slip surface 30" wide x 29.5" height

Quality and Safety

Heavy gauge steel built for daily heavy use. Performs the same on year five as day one. Sled safety stops protect your joints. High density pads holds their shape set after set.

Storage

Smaller footprint than a standard leg press, no functionality sacrificed. Integrated plate storage keeps weight off the floor and your gym clean.

Most Innovative Leg Press

Three machines. One compact footprint. Zero compromise. The Compact Leg Press delivers leg press, hack squat, and calf raise in a single unit designed for athletes from 4'11" to 7' feet tall. All without the cost or floor space of multiple dedicated machines

The hack squat pads offer independent horizontal and vertical pad adjustment, while the 30-inch footplate provides multiple foot positions. The machine carries a 700 lb weight rating with a 38 lb sled. Heavy-gauge steel construction ensures consistent performance over long-term use.
